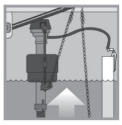
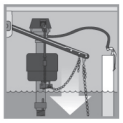
**LEAK SENTRY®**
When a leak starts to drain the toilet tank, a unique "locking" action prevents the float cup from dropping and tank from refilling.



**LEAK SENTRY® UNLOCKS, TANK IS REFILLED**
To refill the tank, the user is required to press the tank lever. This will unlock the float cup and refill the tank with water.



**TOILET IS READY TO BE USED**
The benefit of the Leak Sentry System is that it doesn't allow multiple tanks of water to be lost. The Leak Sentry® eliminates automatic refill, eliminating water waste.
